

M1-PROB/M1-PROB-LONG SPECIFICATIONS

M1-PROB

Standard remote probe specially designed for use with the M1 Milliohm Meter®. Rugged, stable and accurate, compatible with several different tips types to suit all applications.

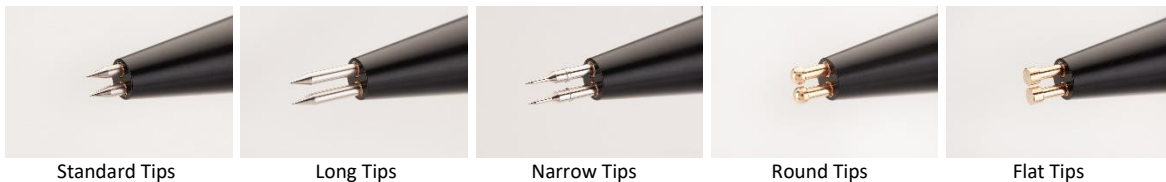

Product Dimensions: Probe body: 5.75" without tips, curly cord 5' (146mm, 1524mm)

M1-PROB-LONG

A longer, narrower tipped remote probe for special applications, specially designed for use with the M1 Milliohm Meter®. Rugged, stable and accurate, compatible with several different tips types to suit all applications.

Product Dimensions: Probe body: 8.19" without tips, curly cord 5' (208mm, 1524mm)

Available M1-TIPS

M1-EXT

For longer reach and in order to not overstretch the curly cable, please ask about our M1-EXT probe extension cable. Each M1-EXT extension cable allows 4' (1.2m) usable extension; one or several can be used at a time with the M1-PROB/M1-PROB-LONG without interference, loss of stability or accuracy.
